# Take Aways

- Sales Increase for original listed future firms is  positive but could be with the natural increase of overall sales
- We need to prioritize access to sales report for newly firms so we can identify potential missing sales
- Main earning firms for futures are the old ones indicating either the newly listed are small firms on the market or might need help on more exposure
- We are seeing great activity with people finding our future pages through search engines vs direct visitors which we need to maintain through SEO efforts
- Overall visits to future’s key pages are not proportional, vital key pages are not getting attention compare to CFD key pages
