TRADERS PERSONALITY TEST

using IPIP to assess traders' Big Five traits

PropFirmMatch.com

OBJECTIVE

- Have sample size of our users and give them IPIP-based questions to identify and categorize them based on Big Five
- After all the participants have been catalogued, create correlation into Successful Trader Survey to understand if their trait is directly affecting their trading behavior and understand patterns to their personality

UNDERSTANDING TERMS

- **International Personality Item Pool (IPIP)**
  - is a collection of personality assessment questions designed to measure various traits, typically rated on a 1–5 scale. Respondents rate each statement based on how accurately it describes them.
- **Big Five**
  - is a model describing personality through five traits: Openness, Conscientiousness, Extraversion, Agreeableness, and Neuroticism, commonly used to assess individual differences in behavior and temperament.

INTERNATIONAL PERSONALITY ITEM POOL (IPIP)

Instructions: This is a personality test, it will help you understand why you act the way that you do and how your personality is structured. Circle the number that indicates how much you disagree or agree with each statement. Begin each statement with "I...."

Question	Disagree	Slightly disagree	Neutral	Slightly agree	Agree
1. Am the life of the party.	1	2	3	4	5
2. Feel little concern for others.	1	2	3	4	5
3. Am always prepared.	1	2	3	4	5
4. Get stressed out easily.	1	2	3	4	5

PROCESS

- **Sending Out Personality Questionnaire**
  - We will send out the survey to the 956 participants that answered the Successful Trader Survey
- **Questions Included**
  - Questions included can be found on the file “IPIP Questions” which includes 50-item questions that participants will answer based on how accurately describes them.’
- **Processing Answers**
  - Once all the answers have collected, we will make calculations based on their answers starting with the baseline per trait and adding or subtracting based on the keyed question based on “IPIP Questions”

PROCESS

- **Calculation Process**
  - Some of the questions are +keyed and some are -keyed that is based if a trait is positive or not. We will start a trait and its baseline and will collate all the questions that are relative to the trait and we will start adding or subtracting based on how it is keyed
- **Narrative Summary**
  - Per trait, he will have the final scores of respondents and we will apply the scoring guideline found on “IPIP Questions”. The scores are as follows; 0-10 - Low, 19-21 - Moderate and 32-40 - High
- **Data Acquired**
  - At the end of data processing we will have Trader’s scores per trait which then we will make correlations to their Trading Successful Survey

UNDERSTANDING TRAITS OF OUR USERS

AGREEABLENESS

HIGH AGREEABLENESS

- These users are cooperative, empathetic, and trusting. Their interaction with the website is likely to reflect these traits:

HIGH AGREEABLENESS

- Rely on social proof:
  - They'll spend time reading reviews, testimonials, and ratings on your site to guide their decisions.
  - They're more likely to trust recommendations or rankings provided on the website.
- Value user-friendly features:
  - They'll prefer intuitive navigation that feels inclusive and supportive.
  - Features like FAQs, community sections, or beginner guides will appeal to their need for a welcoming environment.
- Avoid conflict or overly complex comparisons:
  - They may avoid delving into firm disagreements or intricate comparisons, trusting your platform to guide them to fair and balanced decisions.
- Interact positively with feedback mechanisms:
  - They're more likely to leave positive reviews or feedback on the site, especially if they had a smooth experience.

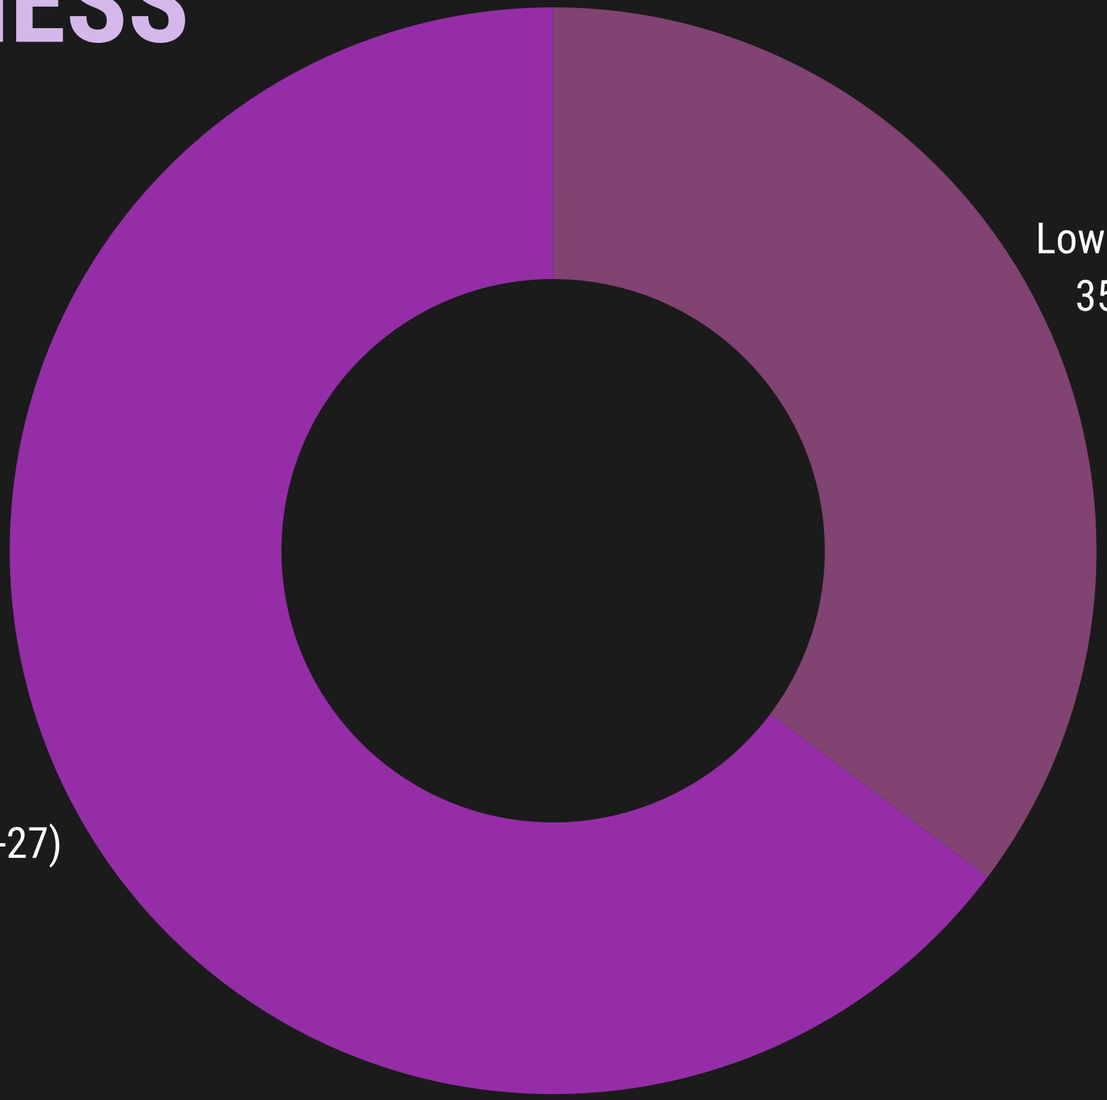
LOW AGREEABLENESS

- These users are more skeptical, competitive, and independent. Their interaction with the website will reflect their critical and self-reliant nature:

LOW AGREEABLENESS

- Scrutinize every detail:
  - They'll dig deep into the terms, conditions, and comparison metrics on your site, looking for loopholes or inconsistencies.
  - They'll question rankings or recommendations, prioritizing their own analysis over suggestions.
- Focus on efficiency:
  - They'll favor quick-access features like filters, search bars, and condensed summaries that help them find exactly what they need without extra fluff.
- Less likely to engage socially:
  - They may skip over community-driven features, like forums or testimonials, viewing them as biased or unnecessary.
- Provide critical feedback:
  - If there are shortcomings in the website (e.g., slow load times or missing details), they won't hesitate to leave constructive or critical feedback.

AGREEABLENESS



CONSCIENTIOUSNESS

HIGH CONSCIENTIOUSNESS

- These users are organized, disciplined, and detail-oriented, and their interaction with the website reflects their methodical approach.

HIGH CONSCIENTIOUSNESS

- Thoroughly explore all options:
  - They will deep dive into comparisons, reading every detail about firms, challenges, and policies on the site.
  - They'll likely spend time with features like comparison tables, detailed breakdowns, and FAQ sections to ensure they fully understand their options.
- Prefer structured navigation:
  - They'll appreciate a well-organized layout that allows them to find information quickly and systematically.
  - Features like filtering and sorting tools will be heavily used to organize results according to their criteria (e.g., challenge price, payout rate).
- Track their journey:
  - They may keep personal notes or use tools like favorites/bookmarks if available to track firms or challenges they're considering.
- Expect reliability and accuracy:
  - Any errors, inconsistencies, or missing information on the site will stand out to them and may erode trust.

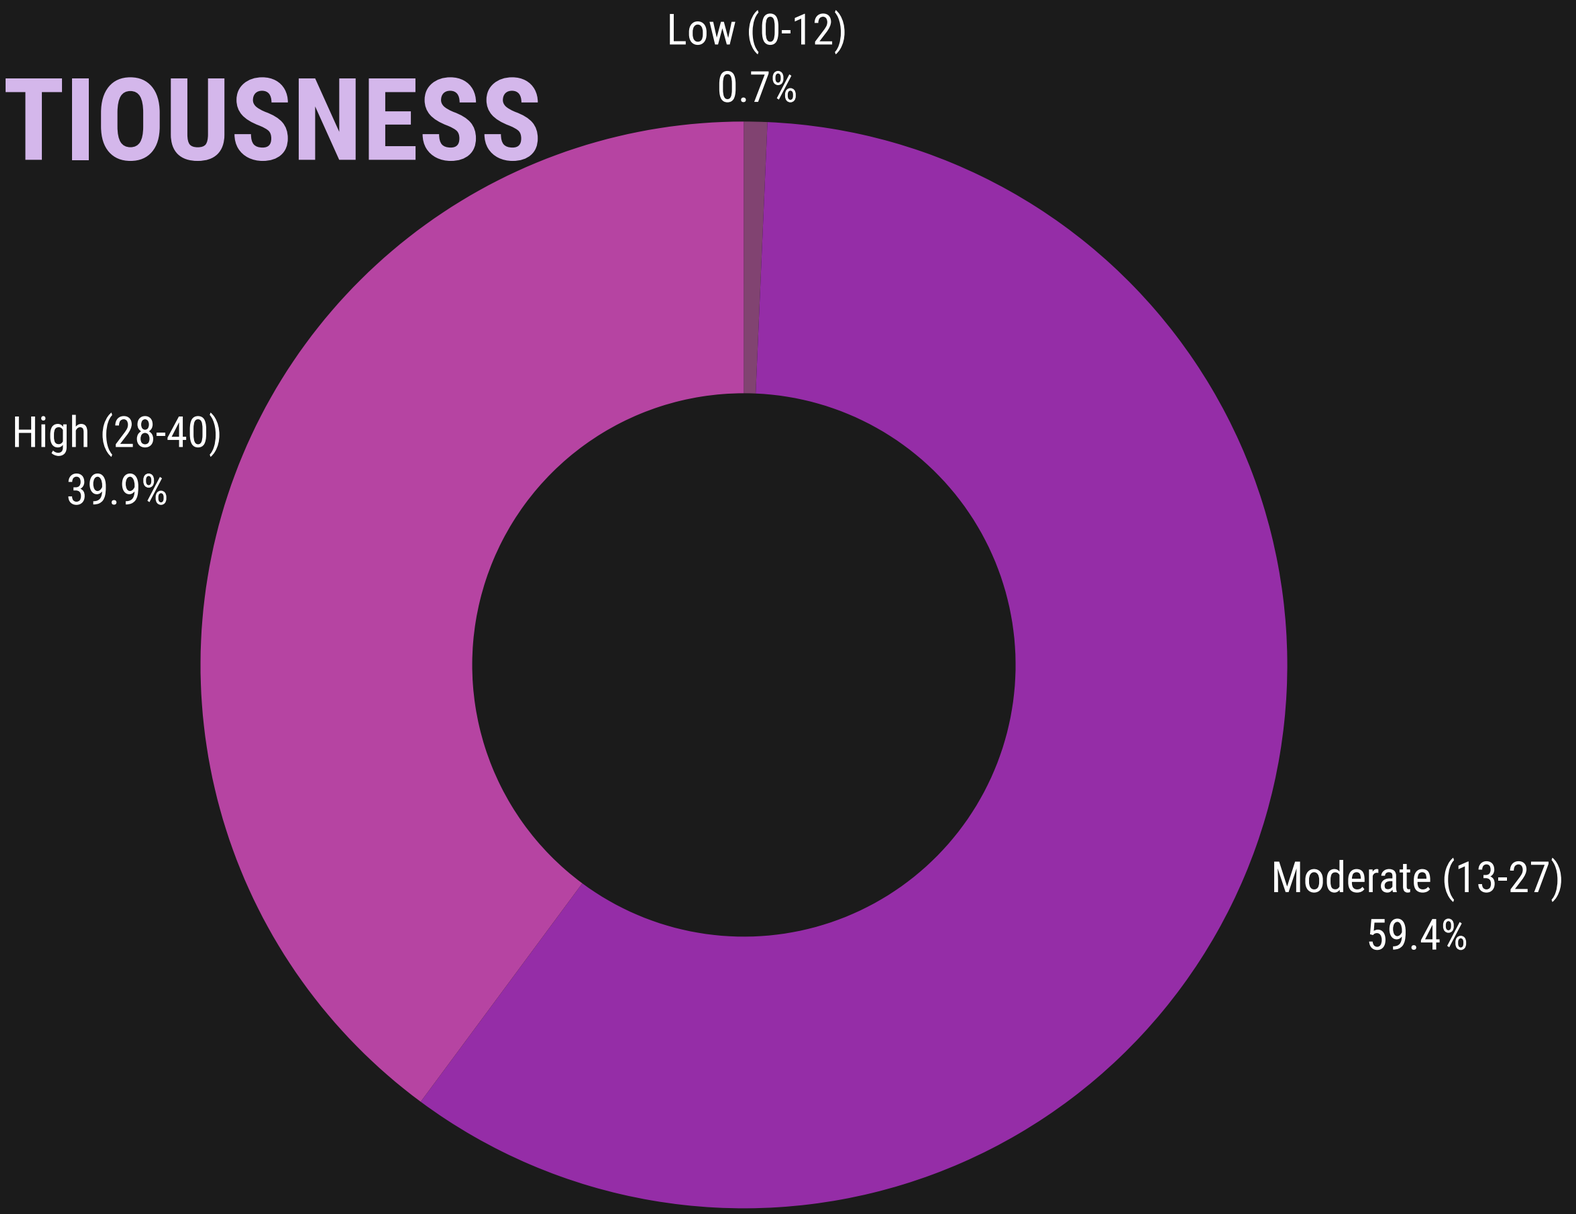
LOW CONSCIENTIOUSNESS

- These users are more impulsive, spontaneous, and less detail-oriented, and their interaction with the site reflects their preference for speed and ease.

LOW CONSCIENTIOUSNESS

- Quick decision-making:
  - They'll skim through options rather than deeply analyzing them, relying on highlighted features or quick summaries to make decisions.
  - They may gravitate toward bold visuals, ratings, or recommendations that simplify their choices.
- Use minimal navigation tools:
  - They're less likely to explore filters or in-depth comparisons, instead using search bars or default settings to find options quickly.
- Focus on instant gratification:
  - Features like "Top Picks" or "Most Popular Challenges" will resonate with their need for speed and simplicity.
  - They might skip past detailed explanations, heading straight to CTA buttons like "Learn More" or "Sign Up."
- Less concern for precision:
  - They're less likely to notice or care about minor inconsistencies in the information presented.

CONSCIENTIOUSNESS



HOW THIS IMPACTS OUR WEBSITE?

For High Conscientiousness Users:

- Provide more details comparison tools, more option for sortable tables, and downloadable resources for in-depth analysis.
- Ensure the website is organized and intuitive, with a logical structure that guides them step-by-step.
- Include features for saving progress, like ability to save filter preference or user accounts where they can save firms or challenges for later review.

BENEFIT TO US

Users with high numbers of High Conscientiousness:

- Considering this, along with data from a previous survey showing that 54% of our users consistently journal their trades and an additional 33% do so occasionally, we are optimistic about the potential success of our upcoming trading platform. These insights suggest that users are likely to gravitate toward utilizing its features.

EXTRAVERSION

HIGH EXTRAVERSION

- These users are outgoing, energetic, and enjoy social engagement. Their interaction with the website reflects their sociable and dynamic personality.

HIGH EXTRAVERSION

- Engage with community-driven features:
  - They'll explore forums, testimonials, or interactive comment sections if available, valuing input from others.
  - They'll likely participate in discussions, leave reviews, or interact with polls and surveys.
- Respond to dynamic visuals and messaging:
  - Eye-catching design elements like animations, vibrant colors, and bold calls to action will grab their attention.
  - They'll favor a tone that feels upbeat and enthusiastic, resonating with their lively disposition.
- Value recognition and achievement:
  - They may enjoy features like leaderboards or badges to track their progress or achievements, even if indirectly related to their trading performance.
- Frequent sharing and referrals:
  - They'll likely share content or recommendations from the site with friends or on social media if it excites them.

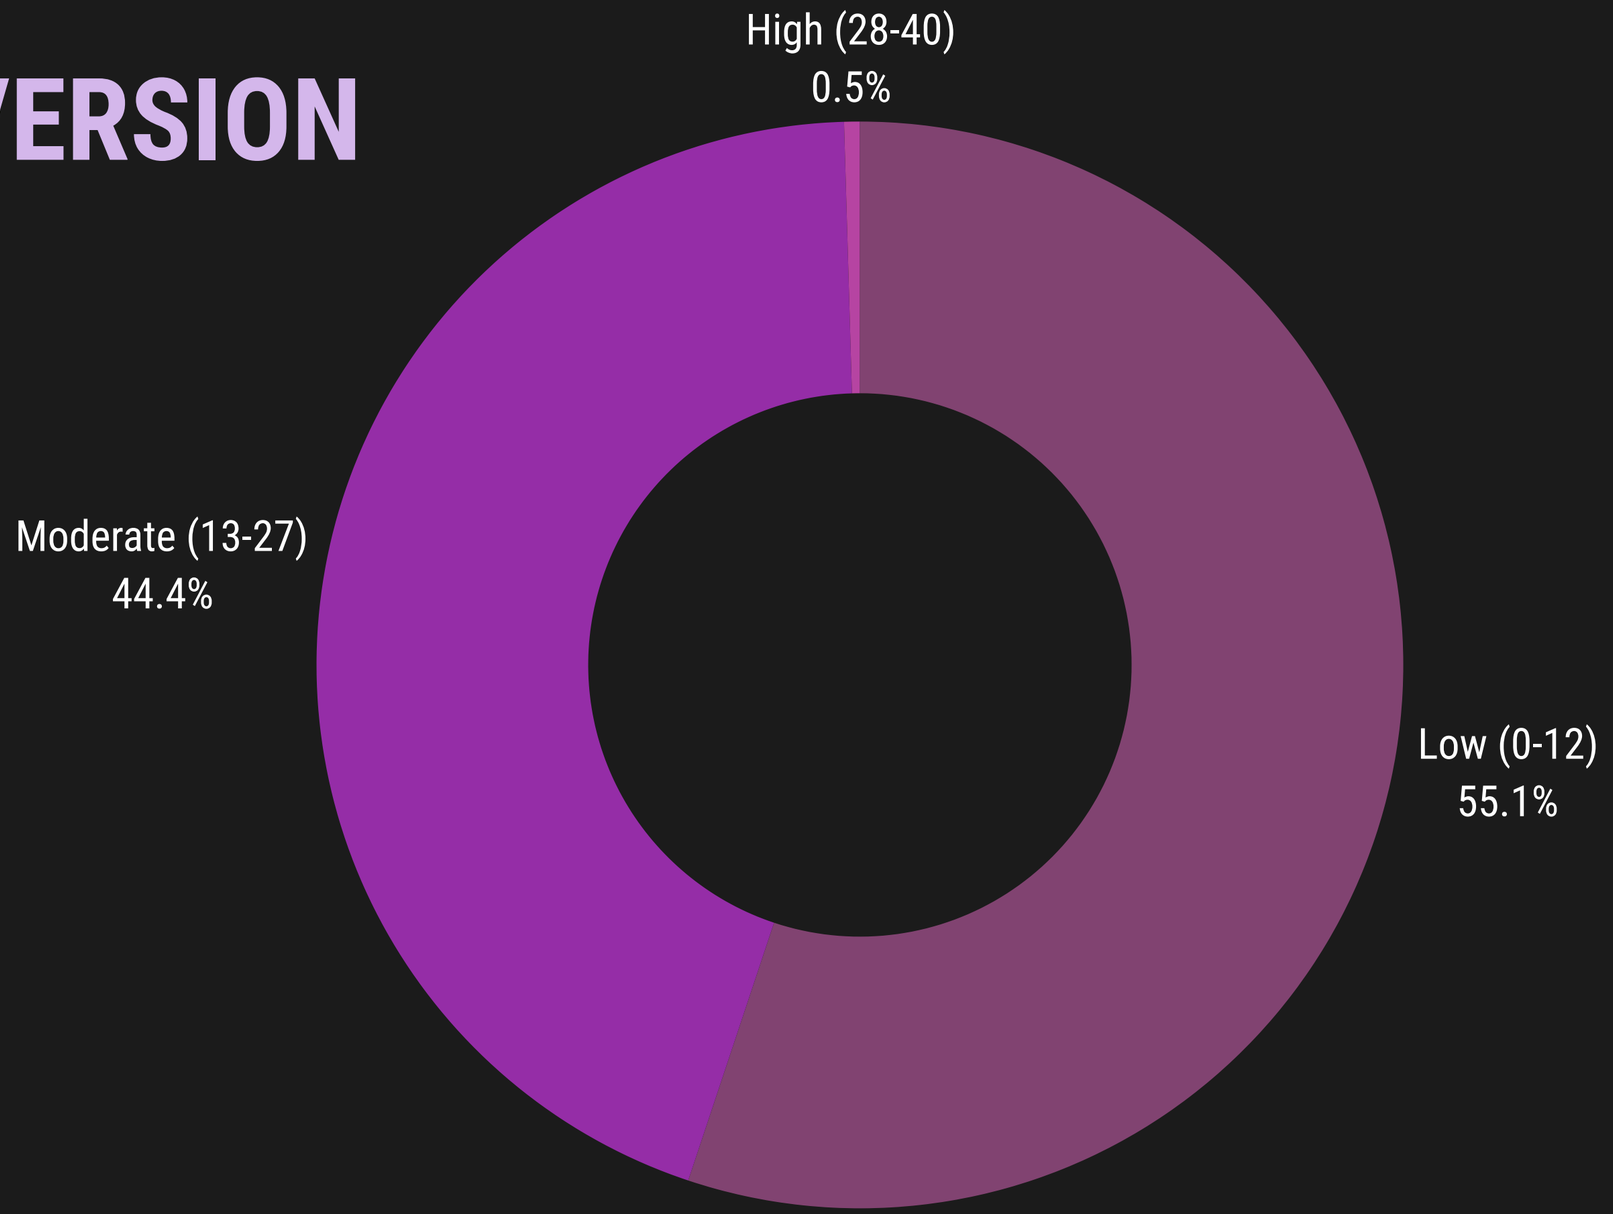
LOW EXTRAVERSION

- These users are reserved, introspective, and prefer solitude. Their interaction with the website reflects their preference for a quieter, more independent experience.

LOW EXTRAVERSION

- Avoid or minimize social features:
  - They’re less likely to engage with forums, testimonials, or social proof elements. Instead, they’ll focus on self-guided research and factual data.
- Prefer calm, minimalist design:
  - A clean, uncluttered interface with subtle tones will appeal to them more than vibrant or highly interactive designs.
  - They’ll appreciate tools that allow for quiet exploration without pop-ups or excessive prompts.
- Favor private interaction:
  - They’ll value features that allow them to bookmark information or track progress without sharing publicly.
  - They may interact minimally with customer service unless absolutely necessary, preferring to find answers independently.
- Seek deep, solitary engagement:
  - They’ll spend time reading long-form content, FAQs, or reports, preferring in-depth material over quick highlights or flashy summaries.

EXTRAVERSION



HOW THIS IMPACTS OUR WEBSITE?

For Low Extraversion Users:

- Focus on creating a quiet, distraction-free environment, with minimal prompts and a streamlined layout.
- Provide detailed resources for self-guided research, such as blogs, in-depth reports, and easy-to-follow comparison tools.
- Avoid over-emphasizing social features, ensuring they can bypass them if desired.

NEUROTICISM

HIGH NEUROTICISM

- These users are emotionally sensitive, prone to anxiety, and reactive to stress. Their interaction with the website will reflect their desire for reassurance and clarity.

HIGH NEUROTICISM

- Seek reassurance through transparency:
  - They'll spend time reading FAQs, guides, and detailed explanations to minimize uncertainty.
  - Clear, visible policies (e.g., refund terms, data privacy) will make them feel more secure.
- Prefer calming design and tone:
  - A clean, organized layout with muted colors and non-intrusive visuals will reduce overstimulation.
  - A reassuring and empathetic tone (e.g., "We're here to help you succeed") will resonate.
- Focus on safety and support:
  - They'll interact with support features such as live chat, email inquiries, or help centers to address their concerns directly.
  - They'll appreciate visible trust signals, such as secure payment icons, testimonials, or verified badges.
- Avoid high-pressure elements:
  - They may be turned off by urgent CTAs (e.g., "Act now! Limited time only!") or anything that heightens their stress.

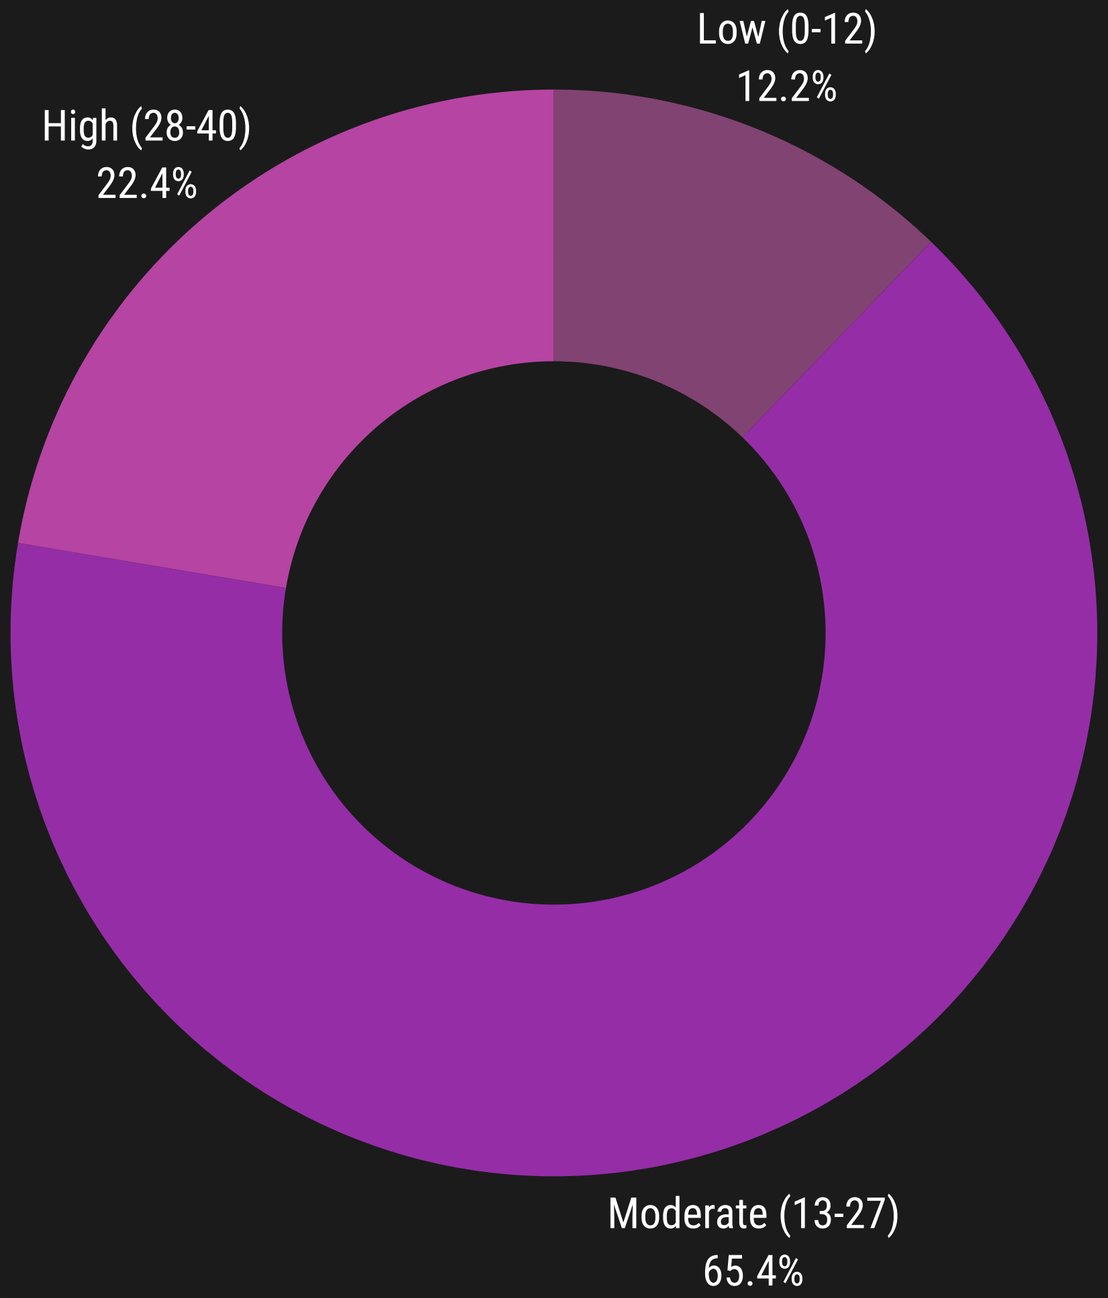
LOW NEUROTICISM

- These users are calm, composed, and less prone to stress. Their interaction with the website will reflect confidence and independence.

LOW NEUROTICISM

- Navigate confidently and independently:
  - They'll quickly explore features without relying heavily on FAQs or support tools.
  - They'll trust the site design and process, requiring less reassurance.
- Respond well to high-stakes options:
  - They're comfortable engaging with challenges or recommendations framed as ambitious or bold.
- Appreciate efficiency over reassurance:
  - They'll skip excessive explanations or redundant content, preferring streamlined navigation and concise information.
- Less reactive to design or tone:
  - While they value good design, they won't be as affected by subtle emotional cues like calming colors or empathetic language.

NEUROTICISM



HOW THIS IMPACTS OUR WEBSITE?

For Moderate Neuroticism Users:

- Seek balanced support:
  - While they don’t require constant reassurance, they appreciate having resources readily available if they encounter questions or concerns.
  - Features like FAQs, live chat options, and help centers should be accessible but not intrusive.
- Value practical transparency:
  - They’ll review the website to ensure it’s trustworthy and clear, focusing on key details like terms, policies, and comparisons.
  - They’re likely to skim longer content, preferring concise but complete explanations.
- Respond to a calm, efficient interface:
  - They’ll appreciate a structured and organized layout that minimizes confusion or frustration.
  - Subtle trust signals (e.g., verified badges, secure payment icons) will reassure them without feeling overbearing.
- Adapt to challenges:
  - They’re not averse to ambitious challenges or opportunities but appreciate realistic portrayals of risk versus reward.

HOW THIS IMPACTS OUR WEBSITE?

- Balanced Tone and Messaging:
  - Use neutral and professional language that avoids being overly cautious or overly aggressive.
  - Highlight both opportunities and risks in a balanced way to foster informed decisions.
- Practical Navigation and Features:
  - Design a user-friendly interface with clear menus, search functions, and comparison tools for quick access to information.
  - Provide moderate guidance, such as pop-ups or tooltips, but allow users to dismiss them easily.
- Accessible Support Without Overemphasis:
  - Include contact options (e.g., live chat, email support) prominently but unobtrusively.
  - Make self-help tools, like knowledge bases or guides, easy to find for those who prefer to resolve concerns independently.
- Clear and Transparent Information:
  - Ensure all details about challenges, firms, and features are presented clearly to avoid triggering doubts or unnecessary stress.
  - Use concise summaries paired with expandable sections for those wanting more depth.
- Subtle Visual Design:
  - Use a clean and calming layout with colors that inspire trust and focus (e.g., blues and greens). Avoid overly energetic or intimidating designs.
  - Maintain a structured flow that guides users logically through their decision-making journey.

OPENNESS TO EXPERIENCE

HIGH OPENNESS TO EXPERIENCE

- These users are curious, creative, and open to new ideas. They enjoy exploring novel concepts, value personal growth, and are eager to try different things.

HIGH OPENNESS TO EXPERIENCE

- Seek unique or innovative features:
  - They'll be drawn to cutting-edge features, such as new ways to compare trading firms or innovative ways to track progress.
  - They might explore interactive tools, gamified elements, or new approaches to learning (e.g., educational content with dynamic visuals or interactive tutorials).
- Interested in diverse options:
  - They'll appreciate the variety of firms and challenges offered on the platform, and they're more likely to explore lesser-known or unconventional options.
  - They may use filters and comparisons to find unique or niche trading opportunities that align with their exploratory nature.
- Engage with educational and intellectual content:
  - They'll spend time exploring detailed articles, blogs, webinars, and videos about trading strategies, market trends, and firm analyses.
  - Content that stimulates thought or provides deeper insights into the trading process will attract their attention.
- Responsive to change and new trends:
  - They'll likely keep returning to the website to explore newly added features, updated data, or emerging trends in the prop trading industry.
  - They may follow innovations in trading methods or market analytics, which could lead them to revisit the site frequently to stay ahead.

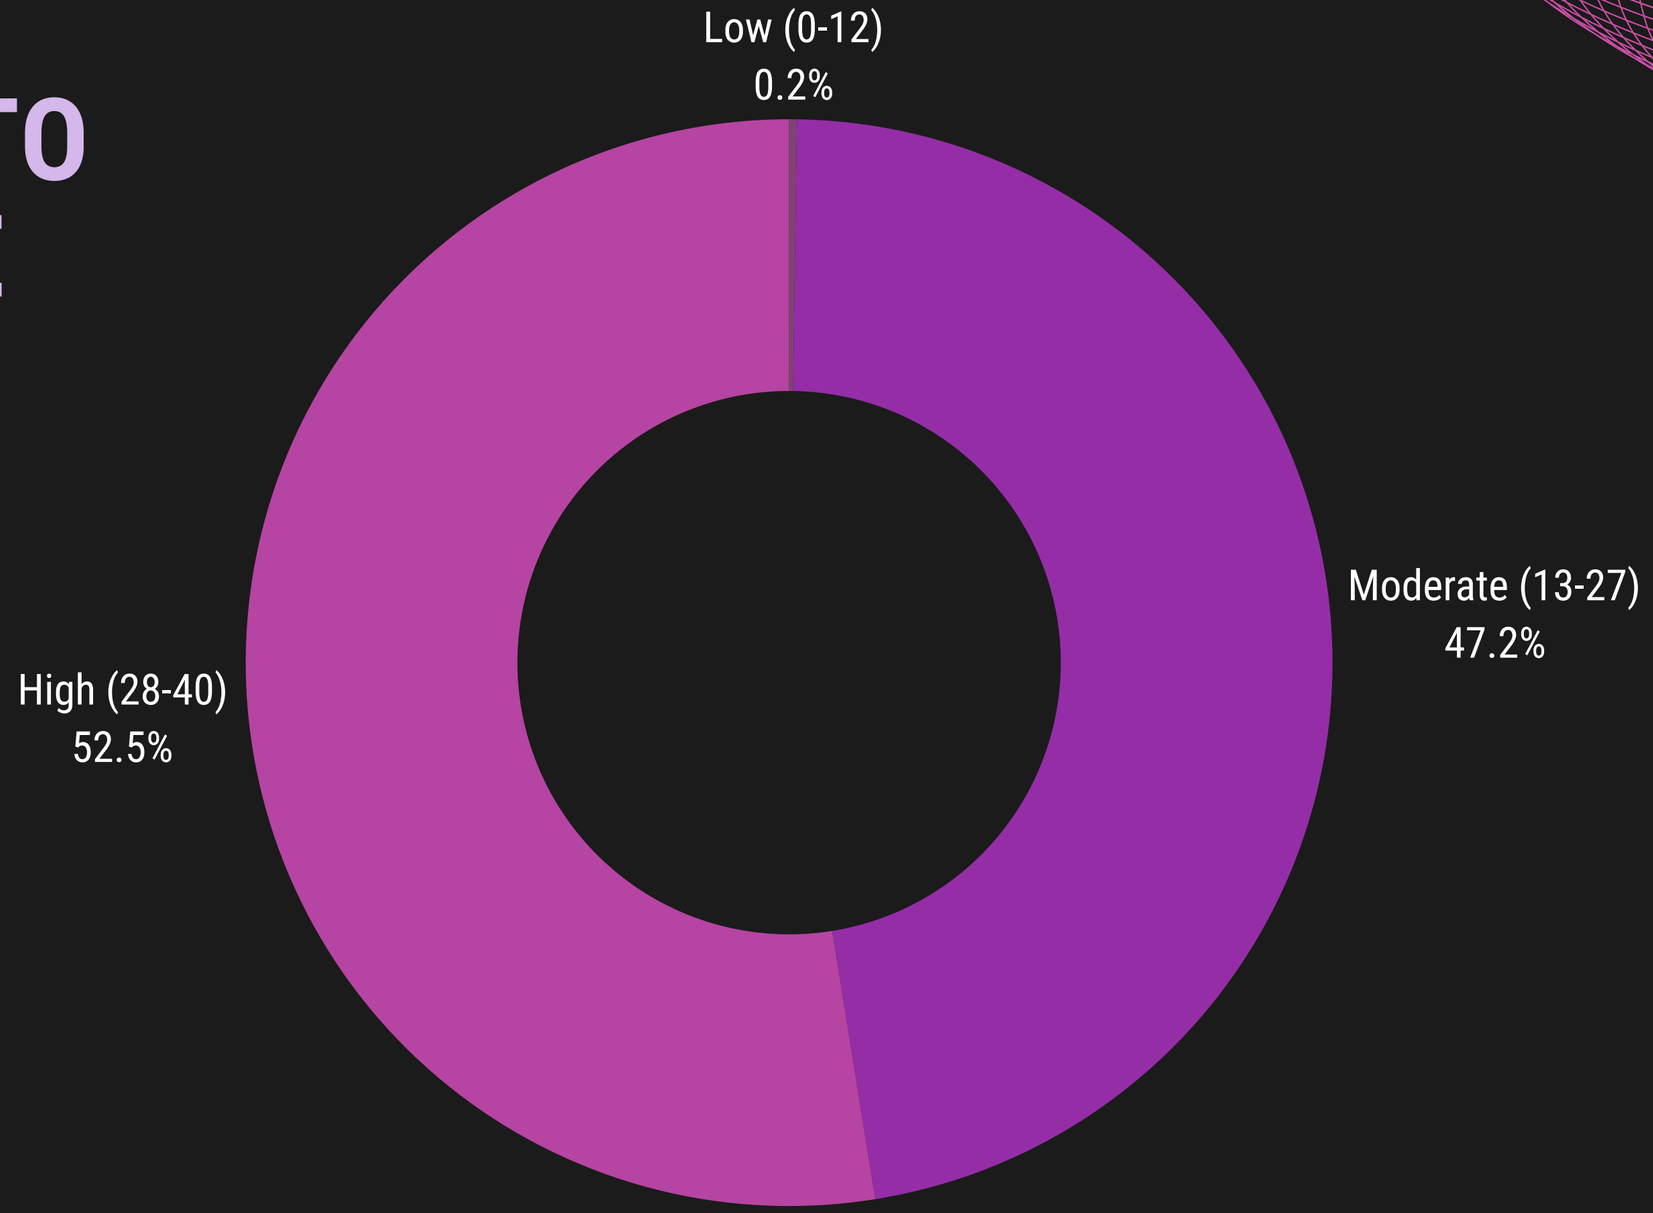
LOW OPENNESS TO EXPERIENCE

- These users are practical, conventional, and prefer familiarity. They are less interested in abstract ideas or experimentation and are more focused on well-established, reliable methods.

LOW OPENNESS TO EXPERIENCE

- Stick to familiar, tried-and-tested options:
  - They'll likely focus on well-known firms with established reputations rather than exploring new or niche options.
  - They prefer simple, straightforward comparisons that don't introduce unnecessary complexity or novel ideas.
- Prefer clear, structured guidance:
  - They will gravitate toward structured resources like step-by-step guides and simplified decision-making tools that don't overwhelm with too many choices or options.
  - They may avoid experimental tools or advanced features, preferring the security of well-known methods.
- Seek stability and tradition:
  - These users value stability and may prefer to work with firms that offer consistent, predictable results rather than newer or riskier options.
  - They may be less likely to explore educational content outside of standard trading practices or fundamental trading knowledge.
- Less likely to engage with creative content:
  - They may avoid features that are too innovative or conceptual, preferring straightforward, practical content that focuses on direct, actionable advice.

OPENNESS TO EXPERIENCE



HOW THIS IMPACTS OUR WEBSITE?

For High Openness to Experience Users:

- Highlight innovative features, such as advanced data visualizations, gamified tools, or interactive comparison charts.
- Provide diverse options and unique opportunities for exploring different firms or trading methods.
- Ensure there is dynamic content, like blogs or videos, that offer new perspectives or unconventional strategies.
- Create opportunities for exploration, with in-depth resources and flexibility in filtering or discovering firms and challenges.
